

Instant Traffic and Weather is one of the best things XM Radio can offer, people like me use XM radio solely to travel accross the US and there is nothing better than being able to get traffic reports and weather of cities you are travelling accross. taking this away would take away not only a great service XM radio offers but also take away something that drivers all accross the US use as way of preventing accidents and avoid hazardous situations! If this isnt important to the Government then i really have no faith left anybody running our country.
